

Requirement: Sr. PHP Developer

The Company:

Indicus Netlabs Pvt. Ltd. owns and operates **RAFTAAR.IN**, India's leading and most comprehensive information portals in the vernacular Hindi language. It operates out of its offices in Nehru Place, New Delhi.

RAFTAAR.IN is the gateway of internet to the Hindi speaking world with about 20 million monthly page views. Raftaar is catching the rapid growth in internet usage among the Indian masses and is therefore expanding its content activities and engagement with sponsors and partners.

Raftaar.in is known for being one of the most trustworthy websites in Hindi, and is expanding its operations to include services on finance and business, women, health and travel. And for this purpose it is looking for a dynamic professional to help it achieve its ambitious targets. The Sr. PHP Developer will have a very strong learning potential with a complete 360 degree view at operating, and expanding a website.

Requirements:

The Sr. PHP Developer would need to have a thorough understanding and experience of both monitoring as well as PHP coding.

Job Description:

Good experience and understanding of

- PHP
- Database mysql & others
- Javascript/jquery
- HTML, CSS
- MVC & OOPS
- Codeigniter framework
- Compatible with running websites designing issues
- Knowledge browser developer tools
- Basic understanding of servers
- Troubleshooting issues that could slow down the process
- Organized and efficient multitasker
- A people person with good interpersonal skills

Qualification: Graduate/Post Graduate in Computer Science or related field

Experience: 1-3 years.

Salary range: As per the industry standards

Career Path: Indicus expects each of its staff to have a long term career objective and matches the employee objectives with job requirements. We have a very flat set-up with reporting directly to operations head. This position can therefore quickly evolve into a leadership role.
